TREE DESCRIPTIONS

WHITE SPRUCE

Ornamental, pointy but not sharp, green needles, very dense branch structures. Medium growing, likes full to partial sun and well-drained soil, hardy and drought tolerant will grow to 50-100' tall and 10-20' spread.

NORWAY SPRUCE

Not tolerant of water soaked or sour soils. Dark green flat needles, fastest growing in the spruce family. Ornamental, Christmas trees and windbreaks, grows 75-100'.

SCOTCH PINE

Rapid growth, dense crown, adaptable to a variety of soil conditions except clay. Withstands excessively moist soils, likes full sun, excellent for Christmas trees.

WHITE PINE

Fastest growing tree, soft light blue-green needles 4" long. Ordinary soil, full sun, can tolerate from normal to wet swampy areas. Good for ornamental or windbreaks, grows to 100'.
